PROFESSIONAL SUMMARY

Software Engineering graduate (2025). Built a complete order, purchasing, inventory and reporting system for my own handmade candle business, covering requirements, database design, development and testing. Strong interest in business systems, databases and SQL; looking for an entry-level functional consultant or junior developer role.

EDUCATION

Bachelor of Software Engineering · *Syrian Private University, Damascus, Syria* Graduated: 2025

MAIN PROJECT

Deniz Studio · Order & Inventory Management System (personal project) *github.com/sumaia-ahmad/deniz-candles*

- Analysed my business workflow and wrote a requirements document with functional requirements and business rules.
- **Sales and payments:** order approval, deposits, order statuses, partial payments and remaining balances.
- **Purchasing and inventory:** stock movements, weighted average cost, low-stock alerts, material consumption.
- **Costing and reports:** unit cost and margin per product; SQL reports for sales, profit and receivables.
- Python, Flask, SQL (SQLite / PostgreSQL), React; 83 automated tests, GitHub Actions CI, Docker.

PROFESSIONAL EXPERIENCE

Computer Science Teacher · *Maali Al-Majd Private School, Damascus* 2023 - 2024

- Taught Computer Science and Information Technology courses to grades 10 and 11
- Developed comprehensive lesson plans covering programming fundamentals and practical applications
- Introduced students to coding concepts, problem-solving techniques, and logical thinking
- Managed classroom activities, assessments, and student progress tracking for multiple grade levels
- Created supportive learning environment encouraging student participation and creativity

Marketing Assistant 2022 - 2023 (1 Year)

- Assisted in marketing campaigns and product promotion
- Gained basic experience in digital marketing and content creation

VOLUNTEER EXPERIENCE

Community Volunteer · *Ammrha Foundation, Damascus* 2019 - 2024

- Child Protection: Participated in initiatives focused on child safety, education, and welfare programs
- Women Empowerment: Supported programs aimed at empowering women through education and skill development
- Elder Care Support: Provided assistance, companionship, and support to elderly community members
- Relief Efforts: Contributed to humanitarian relief activities and community support programs
- Demonstrated strong commitment to social responsibility and community development

TECHNICAL SKILLS

Databases & SQL: SQL (joins, aggregates), Database Design, PostgreSQL, MySQL, SQLite, Migrations
Business Processes: Sales & Orders, Payments & Receivables, Purchasing, Inventory, Costing, Reporting
Programming: Python, JavaScript, HTML, CSS · Flask, SQLAlchemy, React, Pandas
Tools: Git, GitHub, GitHub Actions, Docker, pytest, VS Code

OTHER PROJECTS

- **Supermarket Management API:** Flask and MySQL system for products, categories and sales invoices; tax calculation, automatic stock reduction on every invoice, and sales blocked when stock is insufficient.
- **Data Processing Applications:** Pandas for CSV data manipulation and analysis.

SOFT SKILLS

Teaching and Mentoring, Communication, Problem Solving, Team Collaboration, Time Management, Adaptability, Leadership, Community Engagement
